1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13 & 15, drawn to a thermally conductive composition, classified in class 252, subclass 315.2.
  - II. Claims 14 & 23-26, drawn to a electronic component, classified in class 257, subclass 720.
  - III. Claims 16-22, drawn to a method of increasing heat transfer, classified in class 427, subclass 96+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because one can use a porous inorganic material as a heat dissipation material. The subcombination has separate utility such as semiconductive paste.
3. Inventions III and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a different process such as by doctor blade coating the thermal conductive composition

onto the heat producing component and then place the heat dissipating unit over the thermal conductive composition. The process as claimed can be used to make a glued product.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Atty: Patrick Patnode on April 11, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cathy Lam whose telephone number is (571) 272-1538. The examiner can normally be reached on 9am-6pm.
